ARTHUR T. BODDINGTON CO., Inc.
Seedsmen 342 WEST 14th ST., NEW YORK
WAREHOUSE, 345 WEST 13th STREET
Important to our Customers. When we buy HOLLAND BULBS, we buy what is termed FLORISTS' STOCK, not SEED-HOUSE STOCK. There is a difference.

Months of the year at which the different bulbous stocks are ready for shipment and delivery

**AUGUST** Lilium Harrisii and Formosum; Freesias, Roman Hyacinths, Paper White Narcissus, White Callas, Oxalis, etc.

**SEPTEMBER** Lilium candidum, Hyacinths, Tulips and other Dutch Bulbs.

**OCTOBER** Lilium longiflorum and other Japan Lilies.

**NOVEMBER** Spirea, Lily of the Valley.

**DECEMBER** New Crop of Tuberoses, Begonias, Gladiolus, Gloxinias, Cannas, etc.

N. B.—Easter Sunday, 1916, falls on April 23rd

Remember you may deduct 5 per cent. if cash accompanies order

**OUR TERMS**

Prices named herein are subject to the following discounts: Five per cent. allowed, to be deducted when cash accompanies order. To customers of approved credit accounts are payable sixty days from date of invoice, except where special prices and terms are arranged for. Grass, Grain, Clover Seed, Implements, Fertilizers and Insecticides, subject to no discount whatever, but are strictly net cash.

ORDERS are filled promptly upon receipt, or a reason given with acknowledgment of same. Note above where the different kinds are ready.

**PRICES.** As it is impossible to predict the exact demand, our prices are made subject to change without notice, and goods being unsold when order reaches us. We carry very large stocks, and, if orders reach us in good season, full deliveries may be expected.

C. O. D. orders can be sent only by express. Such orders must be accompanied by a remittance in part payment, to guarantee charges.

ARTHUR T. BODDINGTON CO., INC., give no warranty, express or implied, as to description, quality, productivity, or any other matter, of any seeds, bulbs or plants they send out, nor do they guarantee the successful flowering of seeds, bulbs or plants, or that the same will be free from disease. If not accepted on these terms the goods must be returned at once, and any money that has been paid for same will be refunded.

**BODDINGTON’S “QUALITY”**

**Decoration Day, or May-Flowering TULIPS, Etc.**

The difference between this class of Tulips and the Darwins is in some instances merely a botanical one, of little importance to the horticulturist, consisting of an inconspicuous yellow marking at the base of the petal inside the cup. Some varieties of Cottage Tulips are as large as the Darwins and have petals of obtuse shape. Many of them do not grow as tall as the Darwins, and a majority of the varieties have pointed petals which gives the flower a chalice shape, as will be seen in the accompanying illustration. They flower in May and June at the same time as the Darwins, and the majority of the varieties are equally as desirable.

*Single Late May-Flowering, or Decoration-Day Tulips*
Boddington's “Quality” Darwin Tulips

Live florists are forcing the Darwin Tulips in large quantities. If you have not tried them you had better start, and keep up to date.

Those marked with an asterisk (*) can be forced.

Darwin Tulips are among the most varied and beautiful of all the late Tulips. Flowers are large and borne upon tall, erect stems. Like the May-flowering Tulips, they are indispensable for Decoration Day.

HOUSE CULTURE OF BULBS IN FIBER

How to Grow Bulbs in Vases, Bowls, Jardinieres, etc., without drainage
A delightful and interesting method of cultivating bulbs is to grow them in our specially prepared Fiber in vases, bowls or jardinieres, without drainage. The advantage of this system is that the vases can be placed anywhere about the house without fear of damage from moisture, as drainage with this culture is unnecessary. Any receptacle can be used, provided it is non-porous and large enough to allow space for good root-growth. Our specially prepared Fiber is fertilized and mixed with pulverized charcoal and crushed oyster shells. This combination furnishes all the plant-food elements required by bulbs, and only needs to be moistened with water before use. Almost any of the Spring-flowering bulbs may be grown in our prepared Fiber, but we consider the following species best suited for this purpose: Roman and Dutch Hyacinths, Narcissi, Jonquils, Early Tulips, Crocuses, Scillas, Freesias, Snowdrops, also Lily of the Valley Pips, Spiræas, etc. It is better not to mix different varieties of bulbs in one bowl unless simultaneous flowering can be assured.

CULTURAL DIRECTIONS
When growing bulbs in vases without drainage it is first necessary to water the Fiber, then rub it through the hands until it is free from lumps. If the mixing is properly done the Fiber will increase in bulk, and if taken in the hand and squeezed, little or no water should drop out. When potting, put the large pieces of charcoal (which we send with the Fiber) in the bottom of the vase to absorb the impurities and keep the mixture sweet, then put in 1 to 3 inches of the Fiber, according to the depth of the bowl. After placing the bulbs in position so that their tips reach to within half an inch of the rim, the spaces between and around the bulbs should be filled with the moistened Fiber. It is not necessary or desirable to press it tightly, as the roots do not grow freely if it is pressed too firmly. Small bulbs such as Scillas, Crocuses, Snowdrops, Jonquils, etc., should be planted fairly close together in order to produce the best effect. After planting, the bowls should be kept in a cool, airy cellar or room (not a confined closet) for about eight or ten weeks, so that they may develop good root-growth, which is very essential in order to get good results. The bowls should be examined once a week, and a little water given when necessary, as the Fiber must not be allowed to get dry or the flower buds become "blind." The surface should always look moist, but if too much water has been given the bowl may be held carefully on its side so that the surplus water can drain away. As the growth increases more water will be required and as much light as possible to insure sturdy foliage. A succession of bloom may be had during the Winter by taking into the house a few dishes at intervals of about two weeks.

**WINTER-FLOWERING SWEET PEAS**

_Cultivation._—White-seeded varieties must be sown in sand in small pots, not in earth, or they will rot or “damp off”; later, transplant to the permanent position. Winter-flowering Sweet Peas should not be sown too thickly, about one ounce to 100 feet is sufficient. Thin out to about 3 inches apart when plants are about 6 inches high; if wanted for Christmas, sow before the end of August; if wanted during January, February and March, about the middle of September; if wanted for Easter, about the first of November. For successful growing, a temperature of 40 to 45 degrees at night and 10 degrees higher in the day is considered best. Watch out for red spider, thrips and greenfly. Feed when plants are in full bloom.

**YARRAWA** Absolutely the Best Pink Winter-Flowering Spencer Under Glass.

Bright rose pink, with light wings. Yarrawa has the heavy foliage and strong growth of the Summer-flowering type, and is a true Winter-blooming Spencer. Seed sown early in September and later will flower in December and bloom profusely and continuously until May. Yarrawa is absolutely fixed and true to color and type. The flowers are exquisitely waved and when full grown will average 2½ inches in diameter. They are borne usually in fours on extra long, strong stems. Awarded Certificate of Merit International Flower Show, New York, 1914, and the Pennsylvania Horticultural Society, March, 1915.

CULTURAL DIRECTIONS

Take a clean 5 or 6-inch pot, or 6 to 7-inch pan, and fill it to within 2 inches of the top with coarse ashes; on top of this put about 1/2 inches of fine soil and firm down; give good watering with boiling water, using a fine rose; after drying off a little, sow the spores but do not cover, put in a saucer filled with water, placing a pane of glass over the pot or pan. Never top-water. After first real leaves appear they should be pricked out into flats.

FLOWER AND VEGETABLE SEEDS IN LITHOGRAPHED PACKETS

We carry in stock a very fine selection of seeds in Lithographed packets, put up expressly for the retail florist’s trade. These are “different” from the usual “cheap packets” — and samples will be sent on application. Your name and address printed on packets free, if required. $15.00 per 1000. (No order accepted for less than 1000 packets.)

GRASSES FOR FALL SOWING

“LENOX” LAWN GRASS SEED

We recommend sowing five bushels of seed to the acre. One quart of seed will sow 15 x 20 feet (300 square feet), one bushel 100 x 108 feet (10,800 square feet). Price, put up in handsome packages for store trade, $1.00 per pkg., $8.75 per bus. of 20 lbs., $12.00 per 100 cts., (in quart cartons).

BODDINGTON’S MIXTURE FOR SHADY LAWNS. A mixture of fine grasses for growing in the shade and under trees. Price, lb. 35 cts., 10 lbs. $2.75, bus. (20 lbs.) $5.25.

Crested Dog’s-Tail (Cynosurus cristatus). A valuable grass for lawn or pasture; it forms an even and compact sward. 50 lbs. to the acre. Lb. 40 cts., 10 lbs. $3.50, 100 lbs. $30.00.

English Rye Grass (Lolium perenne). Succeeds well in our middle and eastern states, and adapts itself to a great diversity of soils. Produces a strong, verdiut growth four or five weeks after sowing. 60 lbs. to the acre. Lb. 10 cts., 10 lbs. 90 cts., 100 lbs. $8.00.

Kentucky Blue Grass (Poa pratensis). It is one of our most valuable pasture grasses, very productive and nutritious. 50 lbs. to the acre. Lb. 22 cts., 10 lbs. $2.00, 100 lbs. $18.50.

Red or Creeping Fescue (Festuca rubra). A splendid grass for light sandy soils. Extreme drought-resister. Suitable for put- ting-grens. 30 lbs. to the acre. Lb. 30 cts., 10 lbs. $2.75, 100 lbs. $25.00.
Red-Top Fancy Reclaned Seed (Agrostis vulgaria). Absolutely clean and free from chaff. One of the best grasses for lawn or pasture. 35 lbs. to the acre. Lb. 30 cts., 10 lbs. $2.75, 100 lbs. $22.50.
Rhode Island Bent Grass (Agrostis stolonifera). This variety makes a beautiful close, fine turf, and is one of the best lawn grasses in mixture with other sorts. Adapts itself to almost any soil. 80 lbs. to the acre. Lb. 50 cts., 10 lbs. $4.50, 100 lbs. $40.00.

White Clover (Trifolium repens). Some White Clover is usually included in lawn-grass mixtures. It is of dwarf habit, spreads rapidly and is very hardy. It is valuable in permanent pastures, being sweet and nutritious. In mixtures, 1 or 2 lbs.; if alone, 8 to 10 lbs. to the acre. Lb. 60 cts., 10 lbs. $5.75, 100 lbs. $55.00.
